Scope

The International Journal of Intelligent Systems serves as a forum for individuals interested in tapping into the vast theories based on intelligent systems construction. With its peer-reviewed format, the journal explores several fascinating editorials written by today's experts in the field. Because new developments are being introduced each day, there's much to be learned — examination, analysis creation, information retrieval, man-computer interactions, and more. The International Journal of Intelligent Systems uses charts and illustrations to demonstrate these ground-breaking issues, and encourages readers to share their thoughts and experiences.

Abstrak

Plagiarisme merupakan tindakan tidak etis yang dilakukan dengan menyalin atau mengambil karya, gagasan, atau teks orang lain tanpa memberikan atribusi atau penghargaan yang semestinya kepada sumber asli. Praktik ini sering dianggap sebagai pelanggaran hak kekayaan intelektual dan memiliki dampak negatif bagi dunia akademik, profesional, serta masyarakat secara umum. Seiring dengan pesatnya perkembangan teknologi dan meluasnya akses terhadap informasi digital, plagiarisme menjadi semakin sulit dikendalikan. Hal ini disebabkan oleh kemudahan memperoleh dan menggandakan konten dari berbagai platform daring tanpa izin, baik disengaja maupun tidak disengaja.

Untuk mengatasi masalah plagiarisme, dibutuhkan solusi efektif berupa aplikasi pendeteksi plagiarisme yang mampu bekerja secara cepat dan akurat, khususnya untuk teks berbahasa Indonesia. Aplikasi pendeteksi ini diharapkan dapat membantu berbagai institusi pendidikan, penerbit, dan profesional untuk memvalidasi keaslian karya serta mendorong integritas akademik. Artikel ini berfokus pada pengembangan aplikasi berbasis algoritma similarity atau kesamaan, yang dirancang untuk membandingkan tingkat kemiripan antara dokumen sumber dan dokumen yang diuji. Metode deteksi yang diterapkan dalam aplikasi menggunakan pendekatan perhitungan string matching dan similarity measures, seperti algoritma Cosine Similarity, Jaccard Index, atau Levenshtein Distance. Dengan algoritma ini, aplikasi dapat menganalisis pola dan struktur kalimat secara mendalam, tidak hanya mencocokkan kata-kata secara langsung tetapi juga mendeteksi modifikasi kecil atau parafrasa yang dapat mengindikasikan plagiarisme. Selain itu, aplikasi ini juga dirancang agar kompatibel dengan teks dalam berbagai format, seperti PDF, DOCX, dan TXT, sehingga dapat memudahkan proses pengecekan.

Dear Riyandy,
Thank you for contacting us.
We are sorry to tell you that SCImago Journal & Country Rank is not a journal. SJR is a portal with scientometric indicators of journals indexed in Elsevier/Scopus. We suggest you visit the journal's homepage (See submission/author guidelines) or contact the journal's editorial staff , so they could inform you more deeply.
Best Regards, SCImago Team

This was supposed to be a prestigious journal one day.
I consider this journal completely unprofessional.
After more than half a year with the notification of acceptance, now when we contact them they only say "we will be in touch shortly". 8 months with this joke and no paper publish. Now there is a fee of about 3000\$.
A joke.
